XXL11	1.3	9.1			

Packing Guideline

Individual: 1 Pair

Bundle: 12 pairs in Polybag

Carton: 144 pairs in 12 Bundles

Product Description

InnoFit C1-21 18G Nylon+Spandex DeXtreme Palm Coated Gloves

InnoFit® C1-21 DeXtreme Palm Coated Gloves are the ultimate solution for professionals seeking a 'second-skin' feel with the most comfortable wearing experience. Engineered with a high-performance 18-gauge Polyamide and Spandex blend at its compatible covering ratio, these gloves provide unparalleled dexterity for intricate assembly and technical handling. The specialized DeXtreme of ultimate soft yet durable PU along with state-of-the-art texturized foam nitrile palm coating ensure a non-slip grip while maintaining exceptional breathability for all-day comfort in high-intensity environments.

Key Features & Benefits

Ultra-Fine 18G Knit: The ultra-thin 18-gauge Nylon/Spandex shell offers maximum tactile sensitivity, allowing users to handle even the smallest screws and components with ease.

DeXtreme Palm Technology: The newest polyurethane coating technology designed for 'DeXtreme' grip provides exceptional fitting and outstanding protection against abrasion and tear.

360° Breathability: The lightweight knit construction allows heat to escape from the back of the hand, reducing sweat and increasing comfort during extended shifts.

Ergonomic Spandex Fit: The inclusion of Spandex ensures the glove contours perfectly to the hand, eliminating 'fingertip flop' and reducing hand fatigue.

Durable Reinforcement: Despite its thin profile, the palm coating is engineered to withstand high-friction tasks, outlasting standard dipped gloves in repetitive handling environments.

Specs

Material: 18-Gauge Nylon & Spandex Blend

Coating: Black PU

Color: Blue Shell / Black Palm

Gauge: 18G (Extra Thin/Extreme Precision)

Type: Seamless Knit, Palm Dipped

Cuff Style: Elasticized Knit Wrist

Sizes: Small, Medium, Large, X-Large, XX-Large

Count per Pack: 1 Pair, 12 Pairs per Bag, 144 Pairs per Carton

Compliance: EN388 (3121X), ANSI Abrasion Level 3, CE Certified

Ideal Applications

Precision electronic and small-part assembly

Automotive wire harnessing and interior trim work

Logistics, sorting, and high-speed packaging

General maintenance and light construction handling

[Pro-Tip: Because the C1-21 uses an 18-gauge knit (the higher the gauge, the thinner the yarn), it is the go-to choice for workers who usually find themselves taking their gloves off to perform delicate tasks.
